

6516206479.txt

I am an over-the-road driver. I listen exclusively to XM Radio while on the road. Both the traffic broadcasts and the weather are very important in my line of work. It is imperative that I still be able to hear these broadcasts through the XM network. Please reject the petition before you to prevent these from being cast over the radio service that I, and many others like me, listen to regularly.
